

PASO · SPANISH FOR "STEP"

PASO

Every step counts.

School plans for newcomer students.

THE PROBLEM

MEET ANA.

16

years old

GUATEMALA

just arrived

9TH GRADE

already finished

In Massachusetts, she's put back in ninth grade, because no one can tell what her transcript counts for.

Where she enrolls decides where she starts.

Springfield

64%

Boston

16%

Older newcomers (ages 16–18) placed in 9th grade.

38

point gap, even after comparing similar students.

Ana is a composite. Source: Mantil et al. (2026), Land of Opportunity? Annenberg Institute at Brown University.

WHY IT MATTERS

ANA IS NOT ALONE.

1,070,113

immigrant students in U.S. schools who arrived within the last three school years (2021–22).

1 in 2

Massachusetts high-school newcomers arrive at 16 or older

54%

of newcomers graduate from high school (pre-pandemic)

1 in 6

students entering urban Massachusetts high schools is a newcomer

INTRODUCING

PASO

A transcript photo in. A signed school plan out,
in days, not weeks.

HOW IT WORKS

01

Snap the transcript

The case manager photographs each page. Paso finds the edges. Any language, any format.

WHAT WE HEARD

Staff wait because no recommendation comes with *proof*.

5+ hours

across three weeks, on one Arabic transcript for a 10th-grade Syrian student.

Generic tools

Staff rely on informal Google searches or unstandardized translation tools.

Letters from scratch

Every case gets a custom letter for the district and the family.

Fear of a wrong grade

Staff delay recommendations while they wait for the district to respond.

So every Paso plan shows its proof, and arrives in days.

Source: our Mom Test interview with a youth education specialist at a refugee resettlement affiliate.

MARKET

A \$43M-A-YEAR U.S. MARKET TO START.

Beyond the U.S.: 45M displaced children | **Risk:** refugee admissions 100,034 (FY24) → 10,258 (FY26, 10 mo.). Districts are our second market.

Paso estimates. Inputs, sources and assumptions are in the appendix.

BUSINESS MODEL

NONPROFITS PAY. FAMILIES NEVER DO.

NOW · RESETTLEMENT
AFFILIATES

\$30

per student, from existing youth-services or case-management budgets. 200 students = \$6,000 a year.

NEXT · SCHOOL DISTRICTS

\$120

per plan, below WES (from \$186) and ECE (\$199) course-by-course reports.

UNIT ECONOMICS PER PLAN · MODEL

At \$30

63% gross margin

At \$120

91% gross margin

Cost per plan: reviewer time, 20 minutes at \$30 an hour ($\approx$ \$10), plus AI ($\approx$ \$1). We expect reviewer time to fall as the course map grows.

Prices, costs and margins are model assumptions we are testing, not results. WES and ECE prices from their own websites.

COMPETITION

EVERYONE ELSE DOES HALF THE JOB.

WHY WE WIN

A course map that grows

Every reviewed match, like year-3 math from Guatemala to Algebra 1, is saved and reused.

Proof schools accept

We track how often districts accept our plans. No competitor reports that number.

A buyer no one serves

Resettlement nonprofits pay; families never do. Others sell to individuals or districts.

Source: our competitive scan of each company's own website, October 2026.

HOW WE PROVE IT

TEN FAMILIES FIRST, BY HAND.

MVP 1: ten families with one resettlement partner, run with WhatsApp, Claude checked by a bilingual reviewer, Google Sheets, a paper skills check and a reviewer checklist.

Test	We believe	We're wrong if
H1·Need	Most families can't state their student's placement and next required course without help.	More than half of 8–10 families state both correctly.
H2·Cost	Each student takes at least 4 staff hours and 2 weeks today.	The median across 8–10 case managers is below either.
H3·Price	Affiliates will pay \$30 per student without a new grant.	Most budget holders can't name an approval path.

TARGETS

Time to a plan	2 wks → 3 days
Staff time per student	4 h → 2 h
Families who understand it	80%+
Plans districts accept	70%+

Early signal for H2: one transcript took 5+ hours across three weeks. Targets are hypotheses, not results.

THE TEAM

WHO'S BUILDING PASO.

THE ASK

WE'RE RAISING \$250K.

Pre-seed, on a post-money SAFE, to reach 1,000 signed plans in 18 months.

USE OF FUNDS

- **45%** Product: web app v1
- **30%** Pilots and bilingual reviewers
- **15%** Validation, privacy, compliance
- **10%** Go-to-market

IN 18 MONTHS

- 1,000** signed plans
- 10** paying affiliates
- 70%+** of plans accepted by districts
- 2** district pilots signed

How you can help:

Resettlement affiliate directors

District multilingual-ed leads

Spanish and Arabic reviewers

APPENDIX

SOURCES AND ASSUMPTIONS

Mantil et al. (2023), Rising Numbers, Unmet Needs, Annenberg Institute at Brown: arrivals at 16+, 54% graduation, 1 in 6.

Mantil et al. (2026), Land of Opportunity?, Annenberg Institute at Brown: 64% vs. 16% in 9th grade; 38-point adjusted gap.

U.S. Dept. of Education (OELA), Title III Biennial Report, SY 2020–22: 1,070,113 immigrant students (2021–22).

UNHCR, Global Trends 2025: about 45M forcibly displaced children, end of 2025.

U.S. Dept. of State, FY2025 refugee admissions report: 355 local resettlement sites.

Pew Research Center (2026): 10,258 refugees admitted in FY2026's first 10 months. Williams Institute: 100,034 in FY2024.

Prices: WES Course-by-Course from \$186; ECE Course by Course \$199 (company websites, Oct 2026).

Our research: Mom Test interview with a youth education specialist at a resettlement affiliate; competitive scan, Oct 2026.

Assumptions: \$120 district price; SAM = half of TAM; 10% of affiliates; 200 students per affiliate, 500 per district; reviewer 20 min at \$30/h; AI ≈ \$1 per plan.

Notes: Ana is a composite. Screens are prototypes with sample data. Targets and margins are hypotheses, not results.
